

Study in another country is probably the greatest experience for someone who's looking for meeting a new culture while practicing english language and Strong academic studies. That's my case. On the other hand, before I joined Insper, I have never thought about this idea because of my Family economic condition. But, after taking a full scholarship at Insper, this reality has became to be possible.

When I decided to apply to University of Mannheim, I tried to think someplace that could both provide me an excellence experience on the academic studies and a place totally different from my daily life. Staying in a city that is not consider a big center of german economic, like Frankfurt or Berlin, possibly will give me the opportunity to stay close to the german culture and their costumes. Besides that, University of Mannheim is consider one of the best schools of business in Germany and Europe. I would like to take a new point of view on Business Administration studies and Mannheim is a great option because it's one of the oldest schools of business in Germany and education in that country is a global reference.

Besides of academic studies, speak english is something really important nowadays. I've never had the opportunity to improve the language abroad. But, I know that I am enough prepared to go to Germany and this experience will be decisive for my career, specially in the financial Market, which I would like to work. Staying in a country where few people speak portuguese will be a challenge for me. Moreover, Germany is situated in the heart of Europe and it will let me travel to other countries easily, something that will expose me to many other languages.

I believe that Insper's Scholarship Program and Insper University provide an unique oportunity for students because of the bilateral partnerships with other institutions. I've been planing for the Exchange program since I joined Insper. With no doubts, I will represent my home university well and I will carry the name of Insper with great pride in Germany.
